

KRISHNA PRASAD M

+91 9629979363

krishnampks07@gmail.com

Thuckalay, Kanyakumari, Tamil Nadu, India

SUMMARY

Computer Science Engineering student with hands-on experience in Data Engineering and Analytics across 2 internships. Skilled in Python, SQL, Power BI, and ETL pipeline development. Delivered 5+ data projects, including sales dashboards, sentiment analysis systems, and customer analytics platforms. Holds Snowflake SnowPro Associate and MongoDB certifications.

EXPERIENCE

Data Engineering Intern – UnAbandon AI

June 2026 – August 2026

- Engineered 3 ETL data pipelines processing 50,000+ records daily, cutting data processing time by 30%.
- Automated data quality validation across 10+ sources, improving accuracy from 85% to 98%.
- Collaborated with a 5-member cross-functional team to build scalable solutions for AI-driven applications.

Data Analytics Intern – Brainwave Matrix Solutions

Aug 2025 – Oct 2025

- Analyzed 100,000+ data points using Python and SQL, contributing findings to 3 strategic business reports.
- Designed 4 Power BI dashboards that decreased manual reporting effort by 40%. Delivered targeted recommendations that improved campaign efficiency by 15%.

PROJECTS

UPI Fraud Detection & Risk Analysis | Python, SQL, Machine Learning

- Developed a fraud detection dashboard analyzing transaction amount, device, location, time, and customer behavioral patterns.
- Implemented risk scoring and Safe/Review/Block classification with real-time fraud monitoring and transaction insights.

Airbnb Data Engineering Pipeline | Snowflake, AWS, Dbt

- Built an end-to-end data pipeline using AWS, Snowflake, dbt, SQL, and Git with Medallion Architecture.
- Implemented incremental models, SCD Type 2 snapshots, dbt tests, and Fact/Dimension models for analytics-ready data.

Customer Behavior Analysis | Python, PostgreSQL, Power BI

- Architected an end-to-end analytics pipeline processing 20,000+ customer records across 4 behavior segments.
- Identified a 25% revenue opportunity in underperforming product categories through segmentation analysis.

End-to-End Data Engineering Project using Databricks | Databricks

- Built an end-to-end Databricks data pipeline using PySpark, DLT, Auto Loader, and Unity Catalog.
- Developed incremental ETL pipelines with SCD Type-1, data quality checks, and dimensional models.

Parent-Teacher Communication Portal | Python Flask, SQLite

- Built a role-based portal for Admin, Teacher, and Parent users to manage student data, attendance, and reports.
- Implemented authentication and role-based access using Flask-Login with SQLite database integration.

CERTIFICATIONS

- Snowflake SnowPro Associate – Platform Certification.
- MongoDB Certified – MongoDB Basics for Students Certification.
- Databricks Certified – Databricks For Data Engineering
- NPTEL Discipline Star – Completed 4+ NPTEL courses with distinction.
- Cloudathon – Secured 5th position out of 50+ teams at Sri Easwari Engineering College.

EDUCATION

B.E. Computer Science Aug 2023 – May 2027
and Engineering

National Engineering College, Kovilpatti

CGPA: 7.71 / 10.00

Higher Secondary (XII) Jun 2021 – Apr 2023

Trinity Central School, Kanyakumari

SKILLS

Languages: Python, Java, SQL, PL/SQL

Data Engineering & Analytics: Databricks, dbt, Power BI, Pandas, NumPy, Matplotlib, Seaborn, ETL Pipelines

Cloud Service: AWS (5 Services)

Databases: Postgres SQL, Mongo DB, Snowflake

LANGUAGES

- English (Fluent)
- Tamil (Fluent)
- Malayalam (Native)

INTERESTS

- Data Analytics and Visualization
- DevOps Open Source Technologies
